Revision History

Updated Product Features topic.

Overview

Tracer® TU is the Service Tool that supports Trane BACnet® controls and interfaces. Tracer TU Standard Edition is used to setup and configure Symbio 800 controls for IntelliPak, as well as the Symbio™ 700, Symbio 210, Tracer UC400, and Tracer UC210 programmable controllers. It is also used to create graphics in the UC600, Tracer SC, and Tracer Ensemble.

Packaged Contents

Part number X450917161001 includes:

- One (1) USB cable (Type A/B)
- One (1) Tracer TU Adapter (Wired/Wireless) with user instructions
- One (1) year software license

Product Features

You can perform the following equipment/system configuration, monitoring, and service tasks with Tracer® TU Standard Edition plus Graphics (as supported by the connected controller):

- Connect to a UC400, UC210, Symbio™ 210, Symbio 400B, Symbio 500, Symbio 700, Symbio 800 IntelliPak, BCI-R, BCI2-R, BCI-I, BCI2-I, and Tracer SC, or Tracer SC+ via:
 - USB cable
 - Tracer SC pass-through (equipment controllers only)
 - Zone sensor
 - Wireless network using the Tracer TU Adapter (Wired/Wireless)
 - Trane Connect Remote Access (Tracer SC, Tracer SC+, Symbio 700, Symbio 800 IntelliPak)
- View the status of controller, points, and alarms.
- Configure, edit, and override points.
- Manage controller settings.
- Create configurations for VAVs, Trane factory blower coils, fan coils, unit ventilators, generic space controllers, and water source heat pumps.
- Balance air valves, water valves, and ECM fans.
- Configure UC600, Symbio 500, Symbio 700, and Symbio 800 schedules.
- Download/backup configuration files to/from multiple devices in one operation.
- Create and maintain wireless networks.
- Create, modify, and download graphics to UC600, Symbio 400B, Symbio 500, Symbio 800, Tracer SC, Tracer SC+, and Tracer Ensemble.
- Run Symbio 700, BCI-R, and BCI2-R service test mode.
- Update controller firmware.

- Edit communication protocol settings, including BACnet and IP settings.
- View controller event log.
- View/Create/Edit Modbus Server register mappings for Symbio 400B, Symbio 500, Symbio 700, and Symbio 800.

Laptop Requirements

Your laptop must meet the following hardware and software requirements:

- 8 GB RAM
- 1024 x 768 screen resolution
- Ethernet 10/100 LAN card
- An available USB2.0 port
- Windows 10 Version 1709 (Fall Creators Update) operating system (32 -bit or 64 -bit)
- Microsoft .NET Framework 4.8 or later (auto-installed as required)
- Microsoft Visual C++ Redistributable for Visual Studio 2015, 2017 and 2019 (V14.2) (auto-installed as required for TGP2/Trane Legacy USB driver)
- Visual C++ 9.0 (auto-installed as required for AFD3 USB driver)

Notes:

- *Tracer® TU is designed and validated for this minimum laptop configuration. Any variation from this configuration may have different results. Therefore, support for Tracer TU is limited to only those laptops with the configuration previously specified.*
- *For optimal Tracer TU performance, the following features are recommended:*
 - 16 GB RAM
 - A 7200 - RPM hard disk drive or a solid state drive
