

Upgrade Your Access to Find Hidden Opportunities in Your Building

Take Advantage of the Latest Building Technology

Technology presents new opportunities for building systems and operators every day. Trane works hard to ensure that you can benefit from these new opportunities without undue cost and complexity. Trane provides a fast, simple upgrade to your building automation system. Up-to-date building management systems can improve indoor air quality and the productivity of your operations staff. You can rest easy that you are taking advantage of remote access and connected service offerings while being protected by rigorous security practices. Upgrading to the Tracer® SC+ building automation system will give building operators better control of occupant comfort and energy efficiency.

Trane Makes Upgrading Simple

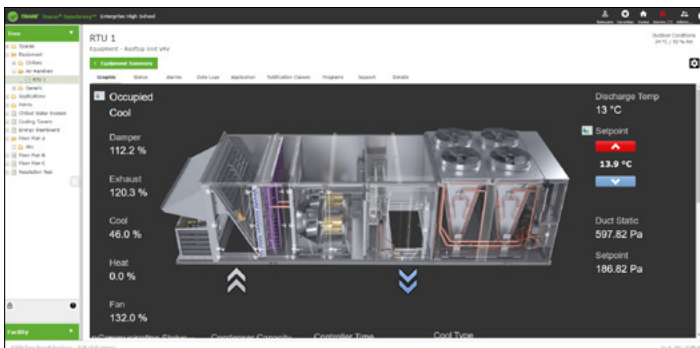

Today you need your buildings to be the best they can be. Trane can help you tap their hidden potential to be more comfortable, sustainable, and influential to your mission. Trane building automation systems also make the connections between technology and people more intuitive, secure, and complete. Ensure your systems are on the latest technology and realize the benefits of upgrading your building automation system.

- **Security** - continuously updated to the latest protection levels to protect one of your most important business assets.
- **Compatibility** - broad support for the most common devices and software to support you where and how you need to use the system.
- **Productivity** - ongoing improvements that drive productivity for building operators.
- **Optimization** - opportunity for the most up-to-date strategies to provide comfort to all occupants in an energy-efficient manner.

In addition to the core elements, an upgrade to Tracer SC+ upgrade unlocks:

- Synchrony interface – improved page & data load times, improved touch device support
- Secure, remote access from all devices using Trane Connect Remote Access
- Intelligent Services Ready – including Remote Monitoring, Building Performance, and Energy Performance
- Improved sequences for Indoor Air Quality and other system operations
- Access to Tracer Ensemble applications including Tenant Services and Work Order Management

Upgrade to Tracer SC+

The upgrade to Tracer® SC+ building automation system offers a secure remote access for users as well as ongoing optimization opportunities for their buildings. Tracer Synchrony™ offers full, intuitive system access, and productivity enhancements for facility managers and service technicians.
