

Trane® Applied Heating Solutions

Sustainability has a warm side.

We're reimagining and redefining how our industry thinks about heating. We've applied Trane's extensive experience in compressor engineering to help deliver energy-efficient, all-season thermal management. Depending on your building's needs, you can opt for a heat pump chiller system with a water-source or air-source heat pump, a heat recovery system or a multi-pipe system that delivers cooling and heating simultaneously.
