

Minimize Disruption with a Simpler Process Chiller Replacement

Get your chiller online faster with less downtime and complexity.

Is Your Process Cooling Putting Production at Risk?

Delaying process chiller replacement can be costly. A 12-hour outage on a \$15,000-per-hour line can result in \$180,000 in lost production, before emergency repair or replacement costs. Unreliable process cooling can lead to:

- Unplanned downtime and production losses
- Poor quality, scrap, and process instability
- Increased pressure on lean maintenance teams
- Disruptions to 24/7 operations

Two Ways to Replace a Process Chiller

The right chiller matters. So does everything it takes to get it running.

Piecemeal Replacement

- Source the equipment
- Hire multiple contractors
- Coordinate four different schedules
- Own the gaps when something doesn't line up

Trane's Turnkey Advantage

A planned replacement is scheduled, budgeted, and doesn't happen at 2AM.

- **One team** from assessment through commissions
- **One schedule** your staff isn't managing
- **One project manager** who owns the outcome
- **One number to call**

Protect your uptime with an end-to-end chiller replacement with Trane.

Our 4-Step Path to Production Reliability

How we work with you, from assessment to long-term support.

Assess: We review your application, operating conditions, and production risks.

Right-Size: We identify the ideal MTA packaged chiller for your load and environment.

Implement: We manage the project for a smooth installation, startup, and commissioning process.

Support: Your Trane team is with you through every stage, with troubleshooting whenever you need.

One Contract.

**One Accountable
Provider.**

**One Coordinated
Path Forward.**

What Is Included in Your Chiller Replacement

A faster, comprehensive offering to meet your operation needs.

- ✓ **Packaged, Air-Cooled Industrial Process Chillers (Up to 53 tons):** Robust, purpose-built MTA chillers sized for your specific process cooling applications.
- ✓ **Expert Application Review:** Support from our experts to select the right equipment for your load and environment.
- ✓ **Full Commissioning Support:** Professional installation, startup, and system verification included.
- ✓ **Nationwide Trane Service Coverage:** Local expertise and troubleshooting support, wherever you need.

**Let's work together to reduce risk and protect your operations.
Talk with an expert about your process cooling needs.**
