

# Comprehensive Healthcare Infrastructure Systems

More than HVAC equipment, we deliver integrated solutions.

Today's healthcare facilities face numerous operational challenges that impact patient experience and financial stability. The collaboration with Trane and Premier provides the tools to make your healthcare environments more reliable, resilient, and sustainable by addressing your complete infrastructure needs.

By combining Trane's world-class products, intelligent controls, comprehensive services, and expertise with the financial opportunities of a Group Purchasing Organization (GPO) like Premier, you get results that both enhance your healthcare facilities and provide financial opportunities to make it happen.

## Outcomes You Need. Solutions that Work.

**Reduced Energy Costs** through enhanced efficiency and predictive maintenance

**Enhanced Comfort** through improved indoor environmental quality

**Improved Staff Experience** in comfortable, well-controlled care environments

**Regulatory Compliance** with automated monitoring and comprehensive reporting

**Environmental Impact** through comprehensive decarbonization strategies

**Financial Flexibility** with diverse funding options and process expertise

**Operational Reliability** through 24/7 monitoring and rapid response capabilities

**Future-Ready Infrastructure** that adapts to evolving healthcare requirements

## Why Choose Trane & Premier?

### Cost Savings

GPOs leverage the collective purchasing power of multiple hospitals and healthcare facilities to negotiate lower prices for medical supplies, equipment, and services. This can result in significant cost savings for individual hospitals, including financial rebates for working with on contract suppliers.

### Efficiency

By consolidating purchasing activities, GPOs streamline the procurement process, reducing the administrative burden on hospital staff. This allows hospitals to focus more on patient care rather than on negotiating contracts and managing suppliers.

### Access to a Broad Range of Products

GPOs typically have contracts with a wide variety of suppliers, providing hospitals with access to a broad range of products and services. This can be particularly beneficial for smaller hospitals that may not have the resources to negotiate with multiple vendors.

### Innovation and Best Practices

Automated systems make accurate regulatory reporting easier, reducing administrative burden and ensuring compliance across member facilities.

### Consultative & Collaborative Approach

- 1 Assess**  
Analyze your current infrastructure while considering how space needs have evolved and will continue to change.
- 2 Mitigate**  
Develop and implement strategies focused on your goals and needs and provide financial options for implementation.
- 3 Manage**  
Focus on ongoing performance post-installation through continuous monitoring and improvements.

## Transform Your Healthcare Infrastructure Today.

From waiting rooms to recovery, every space must be adapted for its purpose while balancing your main mission with operational costs and regulatory compliance. Trane provides comprehensive, proven solutions that help healthcare organizations fulfill their commitments to patients, employees, the community, and the environment.
