

From mixed-use buildings to code-sensitive spaces, **Trane® Mitsubishi Electric VRF and HVRF** deliver precise comfort, energy efficiency and whole-building control — without added complexity.

MIXED-USE

Flexible zoned comfort with optional simultaneous heating and cooling. Plus, optional tenant billing allows individualized billing based on energy consumption.

INSTITUTIONAL

Hybrid systems keep refrigerant out of occupied spaces — reducing leak risk and simplifying ASHRAE 15 compliance in code-sensitive buildings.

HISTORIC

Flexible indoor and outdoor unit options with adaptable routing modernizes comfort without compromising architectural integrity.

COMMERCIAL

Long vertical piping, energy rebalancing and integrated controls deliver precise, floor-by-floor comfort, while supporting tenant build-outs and retrofit changes over time.

EDUCATION

Seamless integration with Trane's full HVAC portfolio balances zoning, ventilation, IAQ, service and comfort requirements through a single control platform.

HOSPITALITY

Quiet operation and individualized comfort control enhance the guest experience while centralized control improves energy efficiency.
