Installer's Guide

Low Ambient Control Kit BAYLOAM011

Used with: *WHC4 *TCC, *YCC and *WCC

Important: ALL phases of this installation must comply with NATIONAL, STATE, AND LOCAL CODES.

Note: * indicates an alpha character.

A SAFETY WARNING

Only qualified personnel should install and service the equipment. The installation, starting up, and servicing of heating, ventilating, and air-conditioning equipment can be hazardous and requires specific knowledge and training. Improperly installed, adjusted or altered equipment by an unqualified person could result in death or serious injury. When working on the equipment, observe all precautions in the literature and on the tags, stickers, and labels that are attached to the equipment.

General

The evaporator defrost control (EDC) is installed in the evaporator (indoor) coil face area. Its purpose is to cycle the compressor when the evaporator frosts under low outdoor ambient cooling conditions. The EDC will open at 0° F and de-energize the compressor circuit. After an increase in coil temperature the EDC will reclose at 50° F and restart the compressor.

Installation (WHC4 Units)

WARNING: Open and lock unit disconnect. Failure to do so may result in severe injury or death from electrical shock, or contact with moving parts.

Parts List

- 1. Two (2) 8-32 x 1/4 hex head screws
- 2. E.D.C. control with two (2) yellow wires attached
- 3. Two (2) insulated wire connectors
- 4. Two (2) yellow wires 60 inches long

Installation (TCC, YCC and WCC Units)

WARNING: Open and lock unit disconnect. Failure to do so may result in severe injury or death from electrical shock or contact with moving parts.
