### Variable Speed ComfortLink™II Heat Pumps

4TWV8024A1000B 4TWV8036A1000B 4TWV8037A1000B 4TWV8048A1000B 4TWV8049A1000B 4TWV8060A1000B

**Note:** "Graphics in this document are for representation only. Actual model may differ in appearance."

22-1892-1F-EN

### **Mechanical Specification Options**

#### General

This unit is designed to operate at outdoor ambient temperatures from  $55^{\circ}$  F to  $120^{\circ}$  F in cooling. From  $-10^{\circ}$  F to  $66^{\circ}$  F in heating (heat pumps only). Only AHRI approved indoor matches are approved for use with these models.

#### ComfortLink<sup>™</sup> II Heat Pumps

This outdoor unit contains the ComfortLink<sup>™</sup> II Heat Pumps digital communication with 2 wire connection to outdoor and Plug-n-Play set up.

#### Casing

Unit casing is constructed of heavy gauge. G60 galvanized steel and painted with a weatherresistant powder paint on all louvered panels and prepaint on all other panels. Corrosion and weatherproof CMBP-G30 DuraTuff<sup>™</sup> base.

#### **Refrigerant Controls**

Refrigeration system controls include condenser fan, compressor contactor and high and low pressure switches. A factory supplied, field installed filter is standard.

#### Compressor

Inverter driven scroll compressor with 25 to 100% output capacity on heat pumps and 30 to 100% output capacity on air conditioners. Noise enclosure minimizes sound levels and built in compressor protection protects compressor will reduce operating speed and current draw to maintain operation while protecting the compressor.

#### **Condenser Coil**

The Spine Fin<sup>™</sup> outdoor coil provides low airflow resistance and efficient heat transfer. The coil is protected on all four sides by louvered panels.

#### Low Ambient Cooling

As manufactured, this system has built in freeze protection that will allow cooling operation below 55°F but will reduce capacity or shut down completely to prevent operation under adverse conditions.

#### **Comfort Control**

The 1050/950/850 Control is required and provides Plug-n-Play setup and 3 wire connection.

### **General Data**

#### AHRI STANDARD 210/240 RATING CONDITIONS

- Cooling 80°F DB, 67°F WB air entering indoor coil, 95°F DB air entering outdoor coil.
- High Temperature Heating 47°F DB, 43°F WB air entering outdoor coil, 70°F DB entering indoor coil.
- Low Temperature Heating 17°F DB, 15°F WB air entering outdoor coil, 70°F DB air entering indoor coil.
- Rated indoor airflow for heating is the same as for cooling.

AHRI STANDARD 270 RATING CONDITIONS - (Noise rating numbers are determined with the unit in cooling operation) Standard Noise Rating number is at 95°F outdoor air.

Trane - by Trane Technologies (NYSE: TT), a global innovator - creates comfortable, energy efficient indoor environments for commercial and residential applications. For more information, please visit trane. com or tranetechnologies.com.

The AHRI Certified mark indicates Trane U.S. Inc. participation in the AHRI Certification program. For verification of individual certified products, go to abridirectory. org.

Trane has a policy of continuous data improvement and it reserves the right to change design and specifications without notice. We are committed to using environmentally conscious print practices.
