

# Product Data

## Variable Speed ComfortLink™ II Side Discharge Heat Pump

*For coastal applications where units are installed within one (1) mile of salt water, epoxy coated models are recommended. These models have an 8 week lead time after order.*

# Mechanical Specification Options

## General

The outdoor condensing units are factory charged with the system charge required for the outdoor condensing unit, ten (10) feet of tested connecting line, and the smallest rated indoor evaporative coil match. This unit is designed to operate at outdoor ambient temperatures from 55° F to 120° F in cooling. From -10° F to 66° F in heating. Only AHRI approved indoor matches are approved for use with these models.

This outdoor unit contains the ComfortLink™ II digital communication with 2 wire connection to outdoor and Plug-n-Play set up.

## Casing

Unit is painted with a glossy corrosion resistant finish on all panels.

## Refrigerant Controls

Refrigeration system controls include condenser fan, high and low pressure switches. A factory supplied, field installed filter drier is standard.

## Compressor

Output Capacity by Tonnage	
024, 036	50 to 100%
048	35 to 100%
060	30 to 100%

Noise enclosure minimizes sound levels and built in compressor protection will reduce operating speed and current draw to maintain operation while protecting the compressor.

## Condenser Coil

The copper tube, aluminum fin outdoor coil provides low airflow resistance and efficient heat transfer. The coil is protected by a wire guard.

## Low Ambient Cooling

As manufactured, this system has built in freeze protection that will allow cooling operation down to 45°F but will reduce capacity or shut down completely to prevent operation under adverse conditions.

## Comfort Control

The 1050/950/850 Control is required and provides Plug-n-Play setup and 3 wire connection.

**Notes:**

- *Measuring place: Hemi-Anechoic chamber*
- *Sound pressure level will vary depending on a range of factors such as the construction of the particular room where the equipment is installed.*
- *Operation sound level may differ depending on operation and ambient conditions.*

- NOTES:**
1. BE SURE POWER SUPPLY JABERS WITH EQUIPMENT NAMEPLATE.
  2. POWER WIRING AND GROUNDING OF EQUIPMENT MUST COMPLY WITH LOCAL CODES.
  3. LOW VOLTAGE WIRING TO BE NO. 18 AWG MINIMUM CONDUCTOR.

**FOR CANADIAN INSTALLATIONS CONSULT THE LOCAL ELECTRICAL CODES.**

**CAUTION: NOT SUITABLE FOR USE ON SYSTEMS EXCEEDING 150V-TO-GROUND ATTENTION: NE CONVERTIR PAS AUX INSTALLATIONS DE PLUS DE 150 V A LA TERRE.**

**HAZARDOUS VOLTAGE!**  
DISCONNECT ALL ELECTRICAL POWER BEFORE SERVICING.  
Failure to disconnect power properly may result in personal injury or death.

**CAUTION**  
USE COPPER CONNECTORS ONLY  
UNIT TERMINALS ARE NOT DESIGNED TO ACCEPT OTHER TYPES OF CONDUCTORS.  
SEE THE WIRING MANUAL FOR WIRING INSTRUCTIONS.
