General Features

Split System Cooling Units . . . The Evolution Continues

2TTB0 split systems represent a product that is not only an engineer's dream, it's also a customer's dream. The design team's mission and accomplishment is enhanced performance and efficiency, improved reliability and durability, and improved installability and serviceability.

Trane's experienced design team applied "six sigma principles", the latest computer

technology and customer research to develop the next generation of leadership products.

Couple the Trane reputation for reliability and durability with the above mentioned mission and accomplishments and you continue to have systems that prove "It's Hard to Stop a Trane."

Features and Benefits

- Climatuff® compressor
- All aluminum **Spine Fin™** coil
- **DuraTuff™** base, fast complete drain, weather proof
- New cabinet with anthracite base and polystate gray cabinet
- Quick-Sess[™] cabinet, service access and refrigerant connections with full coil protection
- · Corrosion resistant finish and fasteners
- High/low pressure & temperature protection
- Liquid line filter-drier
- Easy single side service
- Multi-use liquid and suction line service valves
- Easy top & fan removal

- Full length control cover
- Sure Fast™ seams louver panel removal
- HCFC-22 refrigerant
- Extended warranties available
- S.E.E.T. design testing
- 100% line run test
- Low ambient cooling to 55°F as shipped
- Low ambient to 40°F with EDC accessory AY28X079
- Low ambient cooling to 30°F with EDC accessory AY28X079 and TXV

- $\ensuremath{\,^{\circlearrowleft}}$ Calculated in accordance with Natl. Elec. Codes. Use only HACR circuit breakers or fuses.
- ② Standard Air Dry Coil Outdoor
- ③ This value approximate. For more precise value see unit nameplate.
- ④ Max. linear length 80 ft.; Max. lift Suction 60 ft.; Max lift Liquid 60
- tt.
 For greater length consult refrigerant piping software Pub. No. 32-3312-0* (* denotes latest revision).

 This value shown for compressor RLA on the unit nameplate and on this specification sheet is used to compute minimum branch circuit
 - max. fuse size. The value shown is the branch circuit selection current.
- No means no start components. Yes means quick start kit components.
 PTC means positive temperature coefficient starter.

Mechanical Specification Options

General

The 2TTB0 must be designed to operate at outdoor ambient temperatures as high as 115°F. Cooling capacities are matched with a wide selection of air handlers and furnace coils. The unit is certified to UL 1995. Exterior is designed for outdoor application.

Casino

Unit casing is constructed of heavy gauge, galvanized steel and painted with a weather-resistant powder paint. Corrosion and weatherproof CMBP-G30 DuraTuffTM base.

Refrigerant Controls

Refrigeration system controls include condenser fan and compressor contactor. Another standard feature is the liquid line dryer.

Compressor

The Climatuff® compressor features internal over temperature and pressure protector, total dipped hermetic motor and thermostatically controlled sump heater. Other features include: roto lock suction and discharge refrigeration connections, centrifugal oil pump, and low vibration and noise.

Condenser Coil

The Spine Fin™ coil shall be continuously wrapped, corrosion resistant all aluminum with minimum brazed joints. This coil is 3/8 inch O.D. seamless aluminum glued to a continuous aluminum fin. Coils are lab tested to withstand 2,000 pounds of pressure per square inch. The outdoor coil provides low airflow resistance and efficient heat transfer. The coil is protected on all four sides by louvered panels.

Low Ambient Cooling

As manufactured, this unit has a cooling capability to 55°F. The addition of an evaporator defrost control permits operation to 40°F. The addition of an evaporator defrost control with TXV permits low ambient cooling to 30°F.

Accessories

Thermostats — Heating/Cooling (manual and automatic changeover). Sub-base to match thermostat and locking thermostat cover.

Evaporator Defrost Control — See Low Ambient Cooling.

Outdoor Thermostat — Supplemental heat outdoor ambient lockout from 46 to -10° F.
