

## Temporary solutions from the name you trust

Trane can provide fast, reliable, and cost-effective solutions for your temporary HVAC needs using modern and reliable equipment. More importantly, we have the knowledge and people to turn that equipment into a smoothly functioning HVAC system that can meet or exceed your specifications. Whatever the need, our Trane Building Services team will ensure your system is up and running with minimum disruption.

### Fast

Because speed of unit installation can be extremely important to your business, all Trane rental equipment has been fitted with enhancements that save installation time.

- Cam-lok connections – no tools required to make electrical hook-up
- Structural support – makes handling of equipment easier and safer
- Electrical modifications – warning lights and fail-safe systems to protect and ensure safe operation
- Pump packaging – compact footprint and factory construction speeds installation

Our stocking locations are strategically placed throughout North America to ensure that when a temporary solution is needed, the equipment will be

delivered, installed, and operating – FAST!

### Safe and reliable

While getting your system up and running is of utmost importance to your operation, safety and dependability of the equipment provided are equally important.

- UL Approval – air-cooled units are UL approved after modification to ensure the safest units available
- Coil and Access Protection – protects your facility's personnel while equipment is in operation
- Modern Equipment – continuously upgrade our fleet with the latest Trane equipment
- Factory Inspection/Testing – a complete equipment inspection before every rental job

### Cost-effective

Whatever the application, Trane can provide a cost-effective temporary solution for your organization until you are able to repair or replace your existing equipment.

- Packaged Solutions – everything you need for a complete system from a single source
- Capital Constraints – evaluate rental as an option for the best financial solution
- Comprehensive Pricing - weekly, monthly, or yearly pricing without any hidden environmental or handling fees

## Total solutions provider

Whether we work with you as the prime contractor or contributing partner, we can serve you in a wide variety of ways. Not only are we the industry leader in manufacturing, but we also have the systems and technical expertise to ensure that your HVAC systems are running at optimal levels.

- Industry Expertise – backed by nearly 100 years of industry experience, we can assist you with creating the best engineered solution for your business
- Local Trane Service – over 140 sales and service offices located throughout North America with more than 2,000 factory-authorized service technicians
- Contingency Planning/Emergency Preparedness – work with you to develop a plan so that your facility is prepared in the event of an unplanned loss of cooling capacity — the ultimate goal of the process is to minimize equipment downtime and reduce the risk of financial loss to your organization
- Turnkey Services – from system design, to installation, to on-the-job maintenance, Trane is your single-source supplier

## Rental applications

### R'newals, retrofits or replacements

Eliminates the time pressure associated with getting your primary HVAC system back on line. A rental system can provide continuous cooling/heating during equipment change-outs or planned maintenance.

### Supplemental cooling/heating

Provides additional cooling for those times when your facility's cooling loads exceed your current system's capacity.

### Emergencies

Gets your HVAC system back up quickly in case of a natural disaster or unexpected equipment failure.

### System testing/proving

Allows you to test the requirements or viability of a system before purchasing equipment for a new process.

## Unique/specialty cooling

Provides cooling/heating for a special occasion. Trane's temporary equipment is available for indoor/outdoor ice skating rinks, TV/movie production sets, weddings/engagements, or any other special event.

## Rental equipment

### Air-cooled chillers (460 V):

Scroll .....10 – 60 tons  
Rotary (screw) .....80 – 500 tons

### Water-cooled chillers:

Centrifugal (460 V) .....500 – 1,000 tons  
Centrifugal (4,160 V) .....900 and 1,200 tons

### Air conditioning units (460 V):

Horizontal discharge w/heat .....25, 35, and 50 tons

### Cooling towers (460 V):

Twin cell, open loop .....500 tons

### Power:

Diesel generators .....60 – 2,000 kW  
Transformers, step-up and  
step-down .....300 – 1,500 kVA Electrical cable

### Ancillary equipment:

Pump packages, flex hose, flex duct, heat exchangers, air handlers, dehumidifiers, heaters
