

OEM Advantage

Trane® Branded Scroll Compressors

Why OEM?

Built to the original equipment specifications (OEM), Trane scroll compressors are the standard for use in Trane light commercial and commercial equipment. Trane has been manufacturing scroll compressors since 1987, and is committed to supporting the aftermarket business and service.

As the original manufacturer, Trane branded R-22 and R-410A, 6.2 ton - 30 ton, light commercial & commercial scroll compressors are built to the same tolerances and standards of the compressors in the original equipment. No other manufactures come close to the quality and reliability of Trane scrolls. We are the only company with the original unit specifications and in-depth equipment knowledge. We also provide industry-leading support and warranty coverage with the purchase of our products.

Unmatched Knowledge & Support

As the OEM manufacturer, Trane is able to provide an unrivaled level of support for its light commercial and commercial equipment. From Parts Identification, Technical Service, and Customer Service, Trane is able to ensure that you have the right part and the right level of support to satisfy your customer's OEM replacement needs.

When you need to replace the scroll compressor in your Trane light commercial and commercial equipment, rely on Trane scroll compressors!

Visit your local Trane Supply or Trane parts store.

Trane – by Trane Technologies (NYSE: TT), a global climate innovator – creates comfortable, energy efficient indoor environments through a broad portfolio of heating, ventilating and air conditioning systems and controls, services, parts and supply. For more information, please visit trane.com or tranetechnologies.com.

OEM Scrolls vs. Others

Trane scrolls are the best replacement option for your Trane equipment because of:

- **Warranty** - Trane scrolls offer an excellent warranty, as compared to the industry.
- **Time** - as the OEM replacement, Trane scrolls save you time and money at the job site.
- **Money** - Trane scrolls enable your equipment to operate at its OEM design efficiency.
- **Wear Resistance** - the manganese phosphate coating within the Trane scroll reduces wear between the orbiting scroll and thrust surface. It also has a hardened steel reverse thrust washer on the shaft's lower end for improved wear.

Warranty

Trane scroll compressors come with a 3 year standard replacement warranty.* This top tier warranty sets the Trane scroll apart from its wholesale replacement competitors.

Using OEM compressors will help keep the equipment operating as close to OEM specifications as possible, and the 3 year warranty gives the customer confidence that their purchase is backed by Trane.

An optional extended 4-5 year parts warranty and a 12 month replacement compressor labor warranty are also available for Trane scrolls.*

**Whether you have a standard warranty or a purchased extended warranty, if your compressor fails and you receive a replacement compressor, that replacement compressor assumes the remaining warranty period for the original purchase. It does not provide an additional 36 months of warranty coverage.*

Engineered. Tested. Proven.
