

# Helping You Make Every Event Special

Trane Rental Services

## What every event needs

Your events come in all shapes and sizes, but they generally have one thing in common – they are held in areas where power and temperature control are not easily obtainable. Trane Rental Services has the right equipment to provide a temporary environment that ensures comfortable and successful events.

With many years of experience in creating temporary environments, Trane Rental Services provides you with the right equipment supported by OEM-trained engineers and technicians.

## Special equipment for special events

From weddings to graduations to sponsor tents, you need to be sure that the equipment you use for your event will provide a safe, quiet, comfortable and unobtrusive environment. The Trane fleet of temporary equipment units includes many products that have been specifically designed for special event applications.

## Benefits of using Trane temporary equipment

- We have one of the newest fleets in the industry to ensure reliable and aesthetically pleasing products
- Rental specific modifications that make equipment easier to install with quicker connections for power, water and duct work
- Our products are engineered to create comfortable, environmentally friendly events regardless of size, shape or geographic location.

## From set up to tear down: turnkey services

Beyond rental, Trane is a leading manufacturer in the HVAC industry. We engineer and manufacture the equipment we use to provide a full turnkey solution. Our turnkey service includes the equipment, set up, monitoring and tear down. If an issue arises, you can count on the on-site Trane technicians and project managers to provide you with a single point of contact and seamless customer service.

As a leading manufacturer of HVAC equipment, Trane offers these same products for temporary applications to better serve our valued customers. Trane has assembled one of the largest and most advanced fleets of temporary equipment in the industry. We have everything you need to create a temporary HVAC or power system to get your facility back up and running or make your next event a successful one.

### **Air-cooled chillers**

Combined with chilled water air handling units to provide precise temperature control for large spaces

### **Air-conditioning units**

Restore cooling/heating in an emergency or for previously unconditioned spaces with this complete HVAC solution

### **Air handling units**

Perfect for providing air conditioning to large spaces where high-efficiency filtering with a minimum of noise is required

### **Vertical air-conditioning units**

Designed to cool and heat structures where footprint size and noise output are a concern

### **Diesel generators**

Well-suited for applications where utilities are limited, unavailable or have experienced an interruption in service

### **Portable units**

Great for small areas that require cooling where high-voltage power may not be available
