

Rental Services for Healthcare

Fulfilling your temporary cooling, heating and power needs

Trane Rental Services can help alleviate some of the operational challenges associated with maintaining your healthcare facilities:

- Maximizing system uptime
- Preparing for the unexpected
- Planned Maintenance
- Contingency Planning
- Staff and patient comfort and satisfaction

Our exceptional fleet of rental equipment offers:

- Wide capability to meet all of your needs for cooling, heating, compressed air and power
- Trouble-free installation by Trane Technicians or a contractor of your choice

Trane Rental Services and our skilled Trane Healthcare advisors can optimize your facility to help you maintain excellent patient care.

Preparing for the Unexpected: Contingency Planning Services

With Trane's Contingency Planning services, you will have peace of mind knowing that your plan can be implemented with one simple phone call. We have been working with our business partners for more than twenty years to help them prepare for unexpected events. We start with a financial analysis and risk assessment to help identify potential causes of interruptions and the financial and accreditation compliance impact that such events would cause. We then evaluate the HVAC and power equipment in your facility and prioritize the most critical building loads and process needs for essential operations and to minimize financial loss and maintain accreditation. Our thorough process helps identify temporary equipment connection points and needs as well as plan for temporary equipment locations. The final steps include creation of a customized Contingency Plan, staff training and assignments, and execution of a practice drill. Upon the completion of the Contingency Plan, your facility and team will be prepared for the next unexpected event.

Emergency

Continue Operating: Whether you're dealing with a natural disaster, a power outage, or equipment that has unexpectedly gone down, Trane Rental Services has 24/7 emergency response. Minimize the costs associated with downtime on any of your facilities by leaning on Trane, your trusted partner to get you through these difficult situations.

Maximizing System Uptime

During the peak seasons when your existing equipment may not be enough, temporary equipment can help fill your need to ensure comfortable, safe and effective healthcare environments for your patients and staff. We understand that your facilities require unique and specific environments and conditions that your existing equipment may not have been designed to achieve. Our reliable rental fleet and Trane service technicians can help ensure your specific needs are met.

Indoor Air Quality Improves Patient and Staff Satisfaction

Providing a comfortable environment is extremely important in today's healthcare facilities and can help improve the overall satisfaction of your staff as well as your patients. Operating rooms require specifically controlled temperatures to suit the procedures being performed. Proper Indoor Air Quality (IAQ) can help reduce rates of nosocomial infections, leading to lower infection rates and improved patient satisfaction, as well as reduced sick time of your staff. Trane Rental Services can help you ensure your environments stay comfortable and healthy while performing equipment maintenance, during times of supplemental needs, and in emergencies.

Planned Maintenance

Temporary equipment can help you maintain normal operations during planned shutdowns of HVAC, power, or compressed air equipment in the event of maintenance or major improvements/renovations. When you are planning to improve or renovate, rely on Trane temporary equipment for your business continuity.

Power Generation

It is critical to have 24/7 uptime and more than adequate power redundancy at healthcare facilities. Trane Rental Services offers standby power programs as well as contingency planning services that give you peace of mind and help minimize downtime. Our power generation fleet ranges from 36kW to 1.5MW; with the right plan in place we can have you back up and running quickly. We're here to help you discuss and plan for these situations.

Seasonal

As temperatures fluctuate with the change of seasons, so do the demands of your healthcare facilities. Trane Rental Services offers temporary equipment that can meet your cooling, heating and power needs. Whether you need supplemental 100% outside cooled air conditioning in the summer or heat in the winter, temporary supplemental equipment can fulfill these requirements in a cost-effective manner.

For more information, or to set up a Contingency Plan for your healthcare facility call 1-800-755-7115 and talk to a Trane Rental Specialist today.
