

Rental Services for the Tire Industry

Ensure reliable and quality production

Tire industry cooling needs

Tire assembly consists of numerous components that are built up together and cured under heat and pressure. Temperature control at each step of compounding, component preparation, tire building, curing and final finish test process will ensure quality and reliability of the tire. As the plant operations aim for more efficient and effective processes to gain productivity, it is critical to have a reliable and uninterrupted source of chilled water supply. Apart from emergencies, temporary cooling needs arise in cases of plant capacity expansion and meeting peak seasonal demands. Having a trusted partner to provide a fast and robust solution during such needs will minimize downtime, reduce the risk of financial loss and disruption to production.

A tailored solution to match your process application

Trane engineers will work with your operations team to perform an in-depth assessment of your cooling requirements. The equipment is carefully selected to

match the cooling capacity needed to support your process. The delivery and installation of all rental units are scheduled to integrate seamlessly into your annual production plan.

Why Trane Rental Services?

Option Analyzer provides accurate and detailed operating cost answers for common decisions including:

- Trane has one of the youngest and most technically advanced rental fleets in the industry. This means you are sure to get a reliable, safe and efficient installation.
- Our rental equipment is fitted with special accessories for easier installation and quicker connections to water and power supplies.
- Our wide service network is staffed with experienced factory-authorized technicians.

Turnkey services from start to finish

Trane is a global leader in the manufacture and supply of HVAC equipment. We engineer and build the equipment we use for rental services. Our turnkey services include equipment supply, setup, monitoring and decommissioning. You can depend on Trane technicians to keep your installation running smoothly. We have everything you need to ensure that your production and quality are met to satisfy your customers.

Cooling solutions from the experts in controlled environments

As the industry leader in controlled environments, Trane is always ready with the temporary HVAC and power distribution equipment you need to meet peak demand, emergency outages or planned maintenance.

Our rental fleet is among the largest in the industry, and strategically located to get the right equipment to you quickly.
