

Nexia™ Home Intelligence

Nexia Home Intelligence keeps you in control

Total control from anywhere with a simple web interface

Your independent Trane dealer specializes in creating your ideal home environment. Now your Trane dealer can also give you an unprecedented level of control and security thanks to Nexia™ Home Intelligence remote management and its web based interface. One interface can control many aspects of your home, from your Mini-Split to lights and small appliances. It's total integration from one simple solution.

You can also add optional Schlage® Cameras and Schlage Home Keypad Locks that can be controlled remotely for greater peace of mind.

Manage your environment

- Use a computer or your web enabled cell phone to check the status of your home using Schlage Home Cameras and Schlage Home Keypad Lock
- Enhance comfort by tuning your air conditioning system to meet your needs
- Reduce energy consumption by scheduling your lights and appliances to be on only when needed with the appliance module

Trane Mini-Split Remote Controller

The Mini-Split Remote Controller complements and enhances the functionality of your Trane Mini-Split by allowing you remote access through the Nexia interface.

- Turn your Mini-Split On/Off remotely from most web enabled cell phones or computers to arrive home to your ideal environment
- Change your temperature setting on your Mini-Split
- Change operating mode of your Mini-Split

Add peace of mind to your Nexia Home Intelligence system with optional security features:

Schlage Home Cameras

The Schlage Wireless Camera lets you remotely see what's going on at home through most web enabled cell phones and the Nexia web interface.

Schlage Home Keypad Locks

- Store up to 19 unique user codes and never lose your house keys again
- Receive email alerts when specific codes are entered at the door
- Set 24 hour temporary codes from most web enabled cell phones

Additional convenience is available with your Nexia Home Intelligence system with optional Lighting Control:

Appliance Module

- Turn on or off lights and small appliances remotely anywhere via your web enabled phone or through the Nexia web interface

The Nexia Home Intelligence system provides home comfort options for multiple air conditioning system types:

Trane ComfortLink

- Through the Nexia web interface, remotely control your home's Central Air Conditioning System temperature to suit your family's schedule or turn it on or off
- 7 day programmable thermostat with up to 4 settings per day
- Multiple Trane ComfortLink Remote Thermostats can be added to the Nexia Home Intelligence as needed

The Nexia Home Intelligence communication center:

Nexia Bridge

- Securely connects most in-home Z-Wave® enabled devices to the Nexia Home Intelligence servers through encrypted communications
- Manages communication on your Z-Wave network

Z-Wave devices expand the functionality of your Nexia Home Intelligence

Nexia Home Intelligence is home automation through the Nexia interface, based on a secure universal communication standard known as Z-Wave. This wireless radio frequency-based technology transforms a single device into an intelligent network that can be securely monitored and controlled wirelessly. You can customize with over 200 Z-Wave enabled devices.

An integrated approach to learning, the Trane BTU Crew curriculum compels students to use their campus as a living energy lab. Throughout the course, students:

- An active broadband internet connection and router with at least one available port
- A computer with internet access and a supported internet browser
- A valid email address
- A compatible cell phone with an internet data plan

The Nexia Home Intelligence System requires a monthly subscription fee to enable remote access via most web enabled cell phones and computers. Visit www.casanexia.com.br for more information

Connected Home Support Center

The Trane Connected Home Support Center is happy to provide technical assistance. Should you have questions or encounter any problems with enrollment, set-up or management of your Nexia Home Intelligence System please visit www.casanexia.com.br for solutions and the Connected Home Support Center phone number.

Questions or concerns regarding your Trane system should be directed to your installing dealer. For more information visit us at www.casanexia.com.br.

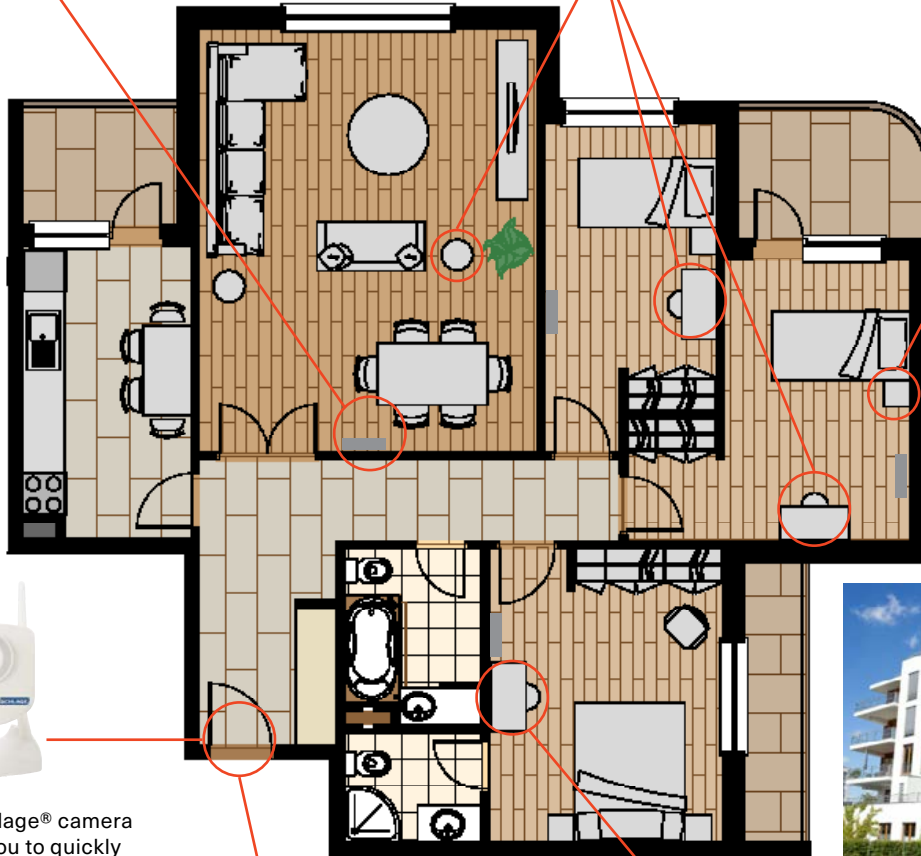

Nexia Home Intelligence is flexible and effective

The Trane Mini-Split Remote Control and Nexia Home Intelligence web interface help you control your Mini-Split, allowing you to turn the unit On/Off and set temperature settings of your home remotely by most web enabled cell phones or computers.

The Appliance Module allows you to control enabled lighting and small appliances from the Nexia Home Intelligence web interface. It also acts as a repeater strengthening your home network.

Many cell phones support the Nexia Home Intelligence applications. To take full advantage of the system's features, follow this link; <http://dl.minhanexia.com.br> on your smart phone to see if it's compatible.

The Schlage® camera allows you to quickly and easily view what is happening at your home even when you are away. Make sure everything is okay from anywhere.

The Schlage lock provides security. Control who is accessing your home and know who accessed your home with codes.

The Nexia Bridge is the brain of the system, enabling communications among system components, and between the system and you from the Nexia Home Intelligence web interface.
