

A Hospitable Welcome

UniTrane™ Vertical High-rise Fan Coil Units for the Hospitality Industry

UniTrane vertical high-rise fan coil units are ideal in-room heating and cooling units for hotels. These compact units which come in six sizes, ranging from 300 to 1,200 CFM are especially well-suited for applications where accessibility or footprint are limited. Trane vertical high-rise fan coil units deliver energy efficiency, quiet acoustic performance and flexible installation options to meet any job requirements.

Enhanced guest satisfaction

With the latest technology to meet your building's needs and keep guests comfortable, UniTrane™ vertical high-rise fan coil units are leading the hospitality industry with lower operating and installation costs.

These units help improve hotel guest satisfaction by offering a quiet operation and improving indoor air quality.

- ✔ **Electronically commutated motor (ECM) softly ramps motor speed, helping reduce audible distraction.**
- ✔ **Return-air door minimizes unit acoustics.**
- ✔ **Cleanable insulation with dual-sloped, slide-out drain pan option allows for easy cleaning, minimizing risk of mold growth.**

Flexible connectivity

UniTrane vertical high-rise fan coil units allow for building connectivity through multiple control options, such as three-speed or variable-speed thermostats. The Telkonet thermostat option can work with an existing lodging energy management system. The thermostat quickly connects with various lengths and feature options to overcome installation challenges.

Support from Trane

Trane's outstanding reputation for high-quality products and service, as well as dedication to innovative solutions, extends to the UniTrane vertical high-rise fan coil units. Trane offers an up-to-five-year extended warranty for parts and labor coverage for the units. Our nationwide network of account managers, service technicians and parts associates will work with you to make sure your equipment is repaired reliably and efficiently, helping to keep the disruption to an absolute minimum.
